[✆ +68987204511](tel:+68987204511)

8-2023 SV Auntie I found a 'new to us' refer repair man in Raiatea. He's really good Capable, professional, and really good. He found a persistent small leak on low pressure side which others had missed. Fluent in English. Boat owner himself. Has all the equipment, battery operated so no need to worry about AC voltage match. Good explanations while he is doing the work. He's quite busy, but he understands weather windows and does his best to fit you in. Highly recommended.

Lago - Multiservice Nautique

Island: **Tahiti**

Lago - Multiservice Nautique [✉ Lagodiciaccio@gmail.com](mailto:Lagodiciaccio@gmail.com)

[✆ +68989264364](tel:+68989264364) (Whats App) Close to Taina marina

9-21 SV Ipanema He is a young French guy who lives in Puna'auia, next to Taina Marina. He speaks a bit of English, he was very responsive to my calls and WhatsApp questions, he was very kind answering all my questions and doubts about my problem and he fixed my refrigerator for exactly half of the price of the main guy here. But more important than the price, it was a pleasant experience. He seems to be eager to get more work. I know it is just one good experience, but maybe it is another option since when I asked around, everyone I talked to felt really trapped by the alternative for this type of work

Luc Vacher-Coponat

Island: **Tahiti**

Luc does refrigeration repairs: [✆ +68987737919](tel:+68987737919)

Recent reports have been awful on this guy. Shoddy work, refusing to stand behind his work Beware this is not a reputable refer guy!!

12-18 La Mizu Would never recommend or use Luc again. VERY unhappy and disappointed with his work. From the SV Bear

9-17 I can't recommend him. He showed up without a flashlight which gave me hesitation. He stared at the machines for quite awhile (3 hours), before adding refrigerant. My AC side of units compressor after his repair ran at 185 degrees and heated my engine room, obviously over charged, and I hope it did not damage the compressor. I saw him the next day and asked him to stop by, a no show along with 3 phone calls. We paid him \$150.00. The engine driven side does not freeze. Bear later reported that they had their fridge serviced in Raiatea and were able to resolve the issues created by Luc

Marine Refrigeration Mike Campbell

Island: **Tahiti**

Mike Campbell Refrigeration and Air Conditioning - Installation - Maintenance - Repair ☐
+68989643260

☐ mikecamalila@gmail.com

Located in Taina on a mooring opposite the super yacht key on board Alila, an Irwin 54 This is the first fridge business that we know that solely specializes in Yachts.

10-2023 SV Hilsen We just had Mike on board the other day and what a joy! He is absolutely a wonderful person with nice attitude and much humor. Beside that he is very skilled at he's work. We had a leaking pipe from the compressor to the fridge. He solved it right on the spot. It only took 2 hours and the price was very fair. I only have good things to say. 5 star service ?????

01-2023 SV Auntie I recommend Mike Campbel for refer repair. He knows his business, has the right equipment, and gets it done. Worth waiting for his expertise.

10-22 SV Malaika Just wanted to share our amazing experience with Mike Campbell. Our water cooling fridge died the other day and we called Mike to have a look. He came and found the problem and the very next day he was changing our system to air cooling one. He was so fast and efficient!! We are so happy with our new silent fridge and it even takes less power now!! So if you have a fridge problem team Malaika highly recommends Mike for the job!! You'll get excellent service and funny jokes ☐☐

10-22 SV Hedonism Just wanted to share our amazing experience with Mike Campbell Our water cooling fridge died the other day and we called Mike to have a look. He came and found the problem and the very next day he was changing our system to air cooling one He was so fast and efficient!! We are so happy with our new silent fridge and it even takes less power now!! So if you have a fridge problem team Malaika highly recommends Mike for the job!! You'll get excellent service and funny jokes

7-2022 SV KONBREO Just wanted to recommend Mike Campbell for anything refrigeration!! My fridge was working 'ok' after a 1 year lay-up but I felt it could be better. Mike was quick to investigate and found a small leak in the pipe connectors. He cut these out, made welded joins, regassed and my system performed 100% better – running less, saving power and keeping the rum perfect temperature! I've recently consulted him again to change from water cooled to air cooled as part of an upgrade I'm planning in NZ. As a superyacht captain I've had a lot to do with so called fridge expert's many who don't really understand small boat systems. But Mikes depth of experience on vessels of all sizes shows, his advice and logic is very sound as is his workmanship. I am happy to recommend him as fantastic resource for the cruising community.

1-22 SV Hedonsim Mike Campbell, our friend and also the "go to" refrigeration guy came by to finish installing our new Danfoss BD50 compressor today. Mike needed to use his big 230 VAC vacuum pump to purge the system so the best way was just to "raft" with us for a few hours. It is very rare for a BD50 to fail but ours did after 16+ years. Mike actually had a new BD50 "in stock" on his boat!! Our new install also includes an air condenser in series with our Keel Cooler so should be pretty efficient and we will be able to run the fridge while "on the hard". Thanks Mike!

12-21 SV Cyrolia- Mike Campbell just installed a new Vitrifrigo freezer unit on my sailboat. Super happy with Mike, the quality of his service and work, and his British sense of humor! And Mike: if you see this... my four tubs of ice cream are rock solid frozen!

7-21 Jacaranda - We returned to the boat in Mo'orea after an absence of two years and the fridge did not start. After conducting some tests at Mikes suggestion I contacted Mike with the results of these tests and Mike gave me a 95% probable rate that it was the controller. I replaced the controller and fridge is working now. Mike is a good guy!

7-21 SV Lilikoi Introduction: We bought our FP Lipar1 41 in Marina Taina in March 2020, then locked down in Hawaii until this week. Finally got to our boat and the fridge didn't work. Looked for info on your guide and found Mike Campbell under Refrigeration repair. Mike dinghies over the day after I asked him for help by email. He assessed the situation, went back to his boat for tools and materials, returned 2 hours later, trouble-shooted it to isolate the controller as the issue, replaced the controller and we have a cold fridge again. Mike is prompt, courteous and professional, as well as a fun-loving guy with a great sense of humor. Highly recommend Mike in the Marina Taina area, and thank you for providing and maintaining your guide for cruisers.

1-21 SV Barracuda Mike came round shortly after we contacted him. He was quick to spot the problem (a change in our power management) and give advice. Definitely knows his stuff and is friendly, responsive and helpful.

12-2020 I first came across Mike Campbell in Palma de Mallorca in 2006 when I was the Captain of a 112 ft Swan called Song of the Sea. He installed a second freezer for us as we were just about to start a Circumnavigation via Tahiti ! Imagine my surprise when in 2020 I was Captain of a Swan 90 in Tahiti with refrigeration problems and bumped into Mike !!! The problem had haunted us all the way from the Canaries without anyone be able to solve the problem. Mike managed to find the problem, which was basically a design error and got the system working better than when the boat was built up in Finland. 3 yrs later and close to 50,000 nm it's still running strong. In fact whilst

back at Nautor last year for a major refit we didn't need to touch the refrigeration and after discussing the fix Mike had carried out Nautor " took it onboard " and are now retrofitting it to vessels that come in for service and I believe new vessels will have it as standard. So apart from his terrible sense of humour , unusual for a Liverpool Lad , myself being one as well, I can highly recommend Mike as a professional and experienced engineer who works hard and is honest. Fair Winds and Smooth Seas Guy Spencer RYA Yachtmaster Ocean CE.

11-2020 SV SV Mat-Lau III Mike has repaired and serviced our fridges twice now, latest Oct 2020. He knows what he's doing, and will also tell you if he's unsure if a particular fix will work, unless tried (in our case we took the chance - it worked). He has replaced copper tubing, bled and re - adjusted pressures, and also given us instruction on testing ourselves, if any future issues may arise. He always returns within a day or so, to ensure things are still working ok. Our fridges are now running perfectly. He does answer calls or emails, and will come within a time span he has indicated. Also has a good sense of humor.

8-2020 SV Sugar Shack We thought we had a slow leak in our fridge. Mike came by to do an initial assessment and scheduled to come back with his tools and Freon. He walked Matt through testing different things to diagnose future issues, filled her up with Freon and gave us many laughs and giggles along the way. Even though he came for two visits and stayed a little more than an hour he only charged us for one hour. He is very professional, kind, and courteous.

Pacific Froid

Island: **Tahiti**

Pacific Froid MOTU UTA PAPEETE ☎ [+68940482750](tel:+68940482750)

✉ pacifique.froid@mail.pf

They are often so very busy that they miss appointments or dont answer the phone. By using Tahiti Crew(see agents)to make the appointment and follow up you may have better luck. Its worth the premium that Tahiti Crew charges to insure they arrive and complete the work properly SV O2

5-19 Went thru Tahiti Crew... Pacific Froid came and fixed both fridge and freezer. Tahiti Crew was able to confirm appointment and follow up. Its worth the extra premium Tahiti Crew charges as she will follow up with them to insure they arrive when scheduled

Techno Froid

Island: **Tahiti**

From Tahiti Crew after asking about who they suggest. Techno Froid, ask for Manu. French speaking One thing though is that techno froid works with agents only, as they had bad

experiences of cruisers not paying their bill, I had them calling me once asking me to be the guaranty of a client who had contact them directly , otherwise they wouldn't work for him.

Close to Papetoi'ai Open for Lunch One of our favorites. Food has always been excellent everytime we have eaten there. Nice outside setting overlooking the water. Get there early if you do not have a reservation. Best to call ahead and reserve a table We have also taken the dinghy there from Tiki Anchorage but its very shallow and you need to proceed with caution

Located Taina 5-2021, Sv Marauder - helped a friend organize a rig-survey with fenua rigging. These guys were on time, nice guys, and they were thorough! Got the survey back within 3 days. I'd recommend them for another survey.

10-2020 SV Nuwam2 Emilien from Fenua Rigging fitted rigging on our boat and very happy with his work????.. They turned up at agreed times for quote and fitting. You can get them to fit your supplied wire or they can manufacture what you require.. French speaking but via email works well and on-site his partner speaks English.

9-2020 Fenua Rigging - our Experience, sv HEDONISM I have been holding back on saying too much about Fenua Rigging as I am not one to go and say negative things about someone or a company however, I feel obligated to speak up so other cruisers are aware of the issues that we had so they can be aware that they MUST be supervised closely! Our background: We have had Hedonism for over 15 years. We have un-stepped the mast a total of 9 times since new and have rigged it ourselves the last 2. (always been present for the other occasions) We needed to do a complete standing rigging change. I contacted the OEM supplier of our rigging and got a complete list of the rigging as it was originally installed on our boat. The order was placed in June in the USA

for a complete set of rigging including all turnbuckles, toggles, mast head toggles, back stay with SSB and so on. We have a Genoa and a Solent headstay. I have been dealing with a health issue here since February and have been recovering so I decided to enlist the services of Fenua Rigging to do the heavy work, especially changing both forestays with the furling rigs. They quoted a labor rate of \$75 per hour (times the two of them so \$150 per hour) and the hours expected were reasonable. When the rigging arrived, they arrived at the appointed time and commenced the work here at Marina Taina. Both Laurie and I were present there to assist as laborers and to observe. They worked very quickly; too quickly in fact so they were prone to making mistakes and taking shortcuts. I am summarizing at the bottom but in one instance, a pin on the Solent stay was not only NOT secured with a split (cotter) pin, it had worked itself out to where the end was flush with the toggle. This was partially hidden by the furling drum that had been dropped into place. It was only that night when I suggested to Laurie to take a closer look, that I disassembled the furler enough so that we could raise the drum assembly up the foils to inspect. It was only then that we realized the significance of the poor workmanship. After that, we had a meeting with Fenua to discuss the issues. Things improved somewhat after that meeting; see bullets below. When we got to installing our new Lower shrouds, they announced that the Terminal end fittings did not fit the mast back plates. After checking the Intermediates and Cap shrouds they advised that the Intermediates did fit but the Cap shrouds did not either. The new shroud terminal fittings were manufactured by Hayn and the original ones by Gibb which is no longer in business. I was advised that I would need to order all new back plates from Hayn. Fenua supplied me with the part numbers that I would need and in fact, sent them to my rigging supplier. I arrange for air shipment and they arrived fairly quickly BUT when they did, I took them to check that the Hayn shroud terminal fittings would fit the new Hayn back plates; they didn't. I got a hold of Fenua to come and take a look which they did promptly. They agreed that they did not fit and offered that perhaps they could arrange a machinist to machine about 2mm off the outside elbow of the fitting. Well, "NOT on my boat" I advised. I knew something was not right so I climbed the mast later and removed a stay to compare against the new Hayne terminal shrouds. Upon inspection it was obvious that the radius of the elbow was not correct when compared to the old one, the Intermediates and to the ones depicted in the Hayne catalog. I took detailed photos and forwarded them to the company that supplied the rigging. Their initial answer was that "Hayn terminals should fit Hayn back plates"! No kidding.... I pressed the company to send my detailed photos to Hayn which they did. Within an hour I got an email back saying that after viewing my information Hayn agreed there had been a manufacturing defect my terminals. (and others perhaps?) Hayn themselves built us a new set of Lowers and Caps and shipped them Air Freight to LAX and then prepaid my Air shipping cost to Tahiti. I was very happy even though the mistake cost us significantly, new back plates were NOT needed (Hayn's were identical to the original Gibb plates), delays, shipping, import fees and so on. Why I am putting this information in a report on Fenua Rigging? Fenua should have seen the defect at the beginning (they are the riggers?) and should not have suggested that we needed new back plates or to "shave 2mm off" the fittings. (I also note that the QA at Hayn and the company that built the stays should have ALSO noticed the defect as well) I have summarized the issues in point form below.

First episode:

- Solent Stay pin not secured with split pin and in fact, worked $\frac{3}{4}$ of the way out, still at the dock!

- Dragging shrouds on deck and the boom leaving large marks on the Gel coat and in the case of the boom, permanent marks on the paint. The Gelcoat was brought back only with 3M Imperial compound a lot of labor.
- Walked on our Hard Dodger without asking if it was okay to do so. Laurie had to stop him and brief him where he could and could not walk.
- Paint chips on the mast where stays and shackles were allowed to bang against the mast
- Furling lines on the headstays were not loaded back on the drums
- After installing the backstay, they were about to leave and I asked them why they did not re-install the SSB cable that they removed. They were not familiar with how to do it but tried. In doing so he just walked out on the boom but still could not quite reach. I was standing right there as he stepped onto our Solar Panel rails. We both yelled to stop but it was too late. We now have a bent tube that we still need to repair. And, he still did not do it correctly so I ended up redoing it myself later in a chair down the backstay.
- The Genoa luff feeder was installed upside down
- It took two full days to get the boat back in shape

Second episode:

- After the new back plates arrived and determining the terminals still not fit, I decided to proceed to have them install the new back plates so as to save time later. This involved removing all of the stays one by one. PRIOR to going up the mast I asked as to “how” he was going to prevent the “old” backplate from falling down inside the mast. He had made up this little “tool” to go in the socket of the plate but never used it. We decided instead to tie a string through a rivet hole and back out the socket. The first back plate had 5 rivets to drill out to remove the back plate. He proceeded to drill out all 5 at the same time and then used a punch to punch out the remaining rivet parts. On the first use of the punch the whole backplate dropped down inside of the mast where it remains. I asked why he did not attach the safety string after drilling the first hole? Pretty simple, drill one hole, punch it out, install the string and then do the remaining 4 rivets. They did NOT want to do that. I insisted, so they did. It was at that point that I almost escorted them off the boat.
- Once finished with the back plates they tensioned and tuned the stays. When I went to feel the Cap shrouds, they were unbelievably tight. I laid down on the boom to eye the mast track and it looked pretty much like a hockey stick. I acknowledge that we still had the Lowers and Caps to install BUT I had instructed them to tune the rig to “go to sea” as at that point I did not know when the new replacement stays would be arriving. We ended up re-tuning the rig ourselves.

Other than that, they were better on the second visit. They took time and care to not drag stays on the deck, covered shroud fittings and shackles when raising and lowering them and so on. This was only after the “meeting” where I pointed out NOT to rush, I was paying them by the hour and close supervision. In closing suffice it to say, I would not recommend Fenua Rigging, especially if you are not completely familiar with the rigging process. If you choose to do so, hopefully this report will give you an idea on what to watch out for. Other than the serious issues noted, I would summarize that they had no respect for our boat at all. It was almost as though they had always worked on older boats that perhaps, did not care. BTW; We subsequently installed the new Lower and Cap shrouds ourselves when they arrived. Bob + Laurie Mackie

9-2020 SV Takamoana Just wanted to give Fenua Rigging our appreciation. They provided a detailed quote to replace our standing rigging and delivered as and when they said. Follow up support was prompt and we are very happy. All European and Australian standard fittings and wire.
