Propellers Shaft

Island: **Tahiti**

I was told they must be shipped in, Ocean 2000 has stock of shafts with machined end to european standards (ISO25??) Poly Industries made spare shaft but did not stock the material which came from Ocean 2000. Sourced flexible coupling from Sopoc. Small machine shop in Tipaerui put proper taper on old propeller; they are at the corner where you make the last turn going to Polybois (see wood)
